SOVIET ASTRONOMY–AJ

Vol. 7, 1963

(Russian Original Vol. 40, 1963, the journal Astronomicheskii Zhurnal)

Agekyan, T. A. Spherical Star Clusters in a Quasi-Stationary State (T) - 243

Aksenov, E. P., E. A. Grebenikov, and V. G. Demin. The Generalized Problem of Motion About Two Fixed Centers and Its Application to the Theory of Artificial Earth Satellites (T) - 276

Alduseva, V. Ya. and I. N. Glushneva. Ultraviolet Emission in the Envelope of β Lyrae (E) - 519

Arkhipova, V. P. Photometry of the Continuous Spectrum of P Cygni Type Stars (T/E) - 51

Arkhipova, V. P. A Determination of the Dispersion of the Absolute Magnitudes of P Cygni Type Stars (E) - 686

Artyukhina, N. M. Positions and Proper Motions of Several Novae (E) - 522

Artyukhina, N. M. and P. N. Kholopov. The Open Cluster M 37 and the Coronas of Star Clusters (E) - 840

Aslanov, I. A., Displacement and Broadening of Fraunhofer Lines. I. The Rotational Velocity of the Sun at the Equator (E/T) - 794

Astapovich, I. S. Book Review: Radar Studies of Meteoric Phenomena, B. L. Kashcheev and V. N. Lebedinets (R) - 300

Baier, V. N. and I. B. Khriplovich. Neutrino Radioactivity and Its Role in Astrophysical Processes (T) - 599

Bespalov, A. V. A New Determination of the Orbital Elements of Seven Visual Binaries (T/E) - 733

Bonelis, I. V., see Fomenko, B. D. - 534

Boyarchuk, A. A. Symposium on Nonstable Stars (R) - 153

Brezhnev, V. S. A Relativistic Model Universe (T) - 215

Byakov, V. M. The Possible Role of the Intergalactic Medium in Maintaining Gas Motions in the Halo (T) - 291

Byakov, V. M. Behavior of the Cosmic-Ray Spectrum at High Energies (T) - 480

Bystrova, N. V. , see Ryzhkova, N. F. - 12

Chebotarev, G. A. Gravitational Spheres of the Major Planets, Moon and Sun (T) - 618

Chertoprud, V. E. The Nature of P_I Type Peaks (E/T) - 35

Ch'iu Yu-mei, see Polyakova, G. N. - 267

Cox, John. P. and Charles A. Whitney. Comments on Zhevakin's Paper, "One Common Error in the Theory of Stellar Variability" (T) - 139

Dagkesamanskii, R. D. and A. A. Korchak. The Determination of Distances to Radio Sources (T) - 443

Deminin, V. G. , see Aksenov, E. P. - 276

Dibai, É. A. Origin of Cometary Nebulae. II (T) - 606

Divari, N. B. Lunar Effects on Zodiacal Brightness (E) - 547

Divari, N. B. and S. N. Krylova. Photoelectric Observations of Zodiacal Light from a High-Altitude Observatory (E) - 391

Dluzhnevskaya, O. Conference on the Methods and Results of Model-Star Calculations (R) - 863

Dokuchaev, V. P. Book Review: Fundamentals of Cosmic Electrodynamics, S. B. Pikel'ner (R) - 447

Doroshkevich, A. G. and Ya. B. Zel'dovich. The Development of Perturbations of Arbitrary Form in a Homogeneous Medium at Low Pressure (T) - 615

Drozdov, S. V. The Determination of Latitude Variations from Observations of Zenith Program Stars (T) - 427

Efremov, Yu. N., see Sharov, A. S. - 727

Egorova, T. M. 21-cm Observations of the Radio Source Sagittarius A (E) - 290

Egorova, T. M. , see Ryzhkova, N. F. - 12

Éigenson, M. S. On the Analogy Between the Structure of the Solar System and the Structure of the Galaxy and Other Spirals (T/E) - 106

Evdokimov, Yu. V. Motion of the Jacobini-Zinner Comet from 1933 to 1946 (T/E) - 415

Fesenkov, V. G. Correction of Photometric Observations of the Zodiacal Light for Tropospheric Scattering (T/E) - 23

Fesenkov, V. G. A Table for the Reduction of Photometric Observations of the Zodiacal Light for the Effect of Tropospheric Scattering (T/E) - 670

Fesenkov, V. G. , Isophotes of Zodiacal Light from Observations Made in Egypt during the Autumn of 1957 (E/T) - 829

Fogel', Ya. M. , see Polyakova, G. N - 267

Fomenko, B. D. , I. V. Bonelis, and V. V. Kybyshkin. Latitude and Height Dependence of Atmospheric Disturbances Caused by Type M Solar Corpuscular Streams (E) - 534

Frank-Kamenetskii, D. A. Radiative Transfer in the Continuous Spectrum in the Absence of Thermal Equilibrium (T) -182

Frank-Kamenetskii, D. A. Plasma Phenomena and Supernova Outbursts (T) -349
Frolov, M. S. The Period-Luminosity Relation for Short-Period Cepheids (E/T) - 86
Furman, A. M. Notes on the Theory of Ionization of Meteor Trails. III. Ionization Due to Air Molecules and Atoms Reflected from a Meteoroid (T/E) - 559

Genkin, I. L. The Dynamics of the Nonstationary Galaxy (T) - 239
Gintsburg, M. A. Structure of the Equations of Cosmic Electrodynamics (T) -536

Abstracts
Abstracts of Papers on Astrophysics Published in Radiofizika, Vol. 5, Nos. 4-6, 1962 (R) - 457
Abstracts of Paper on Astrophysics Published in Radiofizika, Vol. 6, Nos. 1-3, 1963 (R) - 866

Abundances of Elements
Abundances of Nitrogen and Oxygen in the Envelopes of Novae. V. G. Gorbatskii and A. A. Nikitin (E/T) - 656
Chemical Composition of Nova Shells. I. Methods for Estimating the Electron Concentration in Nova Atmospheres Near Maximum Light. É. R. Mustel' (T/E) - 772
Determination of the Chemical Composition of the Solar Atmosphere. R. B. Teplitskaya and V. A. Vorob'eva (E/T) - 778
The Origin of Heavier-Than-Calcium Elements. G. S. Malkiél' (T) - 207

Artificial Earth Satellites
Conference on Photographic Methods of Observing Artificial Earth Satellites. M. I. Illenko (R) - 454
The Generalized Problem of Motion About Two Fixed Centers and Its Application to the Theory of Artificial Earth Satellites. E. P. Aksenov, E. A. Grebenikov, and V. G. Demin (T) - 276

Astrometry
A Study of the Globular Cluster M 13. Z. I. Kadla (E) - 528
Positions and Proper Motions of Several Novae. N. M. Artyukhina (E) - 522

Book News
New Books on Astronomy. G. Khromov (R) - 456
New Books on Astronomy (R) - 867

Book Reviews
Advances in Space Science and Technology, Volume 3. F. I. Ordway, III, Editor. Reviewed by V. G. Kurt (R) - 299

Celestial Mechanics
A New Determination of the Orbital Elements of Seven Visual Binaries. A. V. Bespalov (T/E) -733
Gravitational Spheres of the Major Planets, Moon and Sun. G. A. Chebotarev (T) - 618
Influence of the Figure of the Moon on Its Motion. V. T. Kondurar' (T) - 576
The Generalized Problem of Motion About Two Fixed Centers and Its Application to the Theory of Arti-

ficial Earth Satellites. E. P. Aksenov, E. A. Grebenikov, and V. G. Demin (T) - 276
Two-Body Motion with Corpuscular Radiation. T. B. Omarov (T) - 707

Cepheids
Distance Modulı of the Nearest Galaxies, Derived from Cepheids. Yu. P. Pskovskii (E) - 293

Charged Particles, Acceleration and Emission
Acceleration by Radiation and the Generation of Fast Particles under Cosmic Conditions. V. N. Tsytovich (T) - 471
Nature of Jets in Radio Galaxies. I. S. Shklovskii (T/E) - 748
Nature of the Radio Galaxy Cygnus A. N. S. Kardashev (T/E) - 740
Synchrotron Radiation of Charged Particles in a Dipole Magnetic Field. L A. A. Korchak (T/E) - 764

Clusters, Globular
A Study of the Globular Cluster M 13. Z. I. Kadla (E) - 528
Density Distribution of Bright Stars in M 2, with Remarks on the Dynamical Evolution of Globular Clusters. P. N. Kholopov (E) - 89
Stellar Density Distribution in the Globular Cluster M 15. P. N. Kholopov (E) - 399

Clusters, Open
An Evolutionary Interpretation of the H-R Diagram for the Orion-Nebula Cluster. A. G. Masevich and É. V. Kotok (E/T) - 505
Classification of Open Clusters by Luminosity Function. S. S. Peruanskii (E) - 96
The Open Cluster M 37 and the Coronas of Star Clusters. N. M. Artyukhina and P. N. Kholopov (E) - 840
The Reality of the Open Cluster NGC 7039 (Cr 431). W. Schöneich (E) - 294
The Two-Color Diagram and the Galactic Distribution of Open Clusters. W. Schöneich and N. S. Nikolow (E) - 407

Comets
Cause of Ionization of Cometary Molecules. L. S. Marochnik (T/E) - 544
Interaction between Solar Corpuscular Streams and Cometary Atmospheres. II. "Collapsing" Envelopes. Radio-Frequency Emission. L. S. Marochnik (T/E) - 384
Motion of the Jacobini-Zinner Comet from 1933 to 1946. Yu. V. Evdokimov (T/E) - 415
Observations at Kiev of Comet Seki-Lines 1962. S. K. Vsekhsvyatskii (E) - 133
Remarks on the Magnetic Field in the Tail of the Comet Mrkos 1957d. V. M. Yuzhakov (T/E) - 591
Wave Motions in Comet Tails. L. S. Marochnik (T/E) - 218

Conferences and Meetings
Conference on Photographic Methods of Observing Artificial Earth Satellites. M. L. Illenko (R) - 154
Conference on Photographic Methods of Observing Artificial Earth Satellites. M. L. Illenko (R) - 454
Conference on the Methods and Results of Model-Star Calculations. O. Dluzhnevskaya (R) - 863
Plenum of the Commission on Theoretical Astronomy. M. S. Yarov-Yarovoi (R) - 861
Radio Astronomy in Australia. V. V. Vitkevich (R) - 449
Symposium on Nonstable Stars. A. A. Boyarchuk (R) - 153
The Third Plenum of the Commission on the Physics of Stars and Nebulae. V. V. Ivanov (R) - 304
The Third Conference of Young Scientists. L. V. Rykhlova (R) - 156

Corpuscular Beams
Emission Spectra of Rarefied Molecular Gases Excited by a Mixed Beam of Protons and Hydrogen Atoms. G. N. Polyakova, Ya. M. Fogel', and Ch'iu Yu-mei (E) - 267
Interaction between Solar Corpuscular Streams and Cometary Atmospheres. II. "Collapsing" Envelopes. Radio-Frequency Emission. L. S. Marochnik (T/E) - 384
Latitude and Height Dependence of Atmospheric Disturbances Caused by Type M Solar Corpuscular Streams. B. D. Fomenko, L. V. Bonelis, and V. V. Kubyshkin (E) - 534

Cosmic Electrodynamics
Acceleration by Radiation and the Generation of Fast Particles under Cosmic Conditions. V. N. Tsytovich (T) - 471
An Analysis of Some Mechanisms for the Development of Magnetic Fields in Radio Sources. S. B. Pikel'ner (T) - 463
Fundamentals of Cosmic Electrodynamics. S. B. Pikel'ner. Reviewed by V. P. Dokuchaev (R) -447
Interaction between Solar Corpuscular Streams and Cometary Atmospheres. II. "Collapsing" Envelopes. Radio-Frequency Emission. L. S. Marochnik (T/E) - 384
Spectrum of Magnetohydrodynamic Turbulent Convection. S. A. Kaplan (T/E) - 801
Structure of the Equations of Cosmic Electrodynamics. M. A. Gintsburg (T) - 536
Theory of the Magnetogravitational Instability of a Sphere with Variable Density. V. A. Vardanyan and R. S. Oganesyan (T) - 572
Turbulence of a Conducting Fluid in a Strong Mag-

netic Field. P. S. Iroshnikov (T) - 566
Wave Motions in Comet Tails. L. S. Marochnik (T/E) - 218

Cosmic Rays
Acceleration by Radiation and the Generation of Fast Particles under Cosmic Conditions. V. N. Tsytovich (T) - 471
An Analysis of Some Mechanisms for the Development of Magnetic Fields in Radio Sources. S. B. Pikel'ner (T) - 463
Behavior of the Cosmic-Ray Energy Spectrum at High Energies. V. M. Byakov (T) - 480
Cosmic Rays in Metagalactic Space. V. L. Ginzburg and S. I. Syrovatskii (T) - 357

Cosmogony and Cosmology
A Relativistic Model Universe. V. S. Brezhnev (T) - 210
Behavior of Light in a Pulsating Universe. Priyansy Sengupta (T) - 213
Cosmic Rays in Metagalactic Space. V. L. Ginzburg and S. I. Syrovatskii (T) - 357
Occulted Galaxies and an Experimental Verification of the General Theory of Relativity. Yu. G. Klimov (T) - 664
On the Evolution of a Semiclosed World. I. D. Novikov (T) - 587
The Development of Perturbations of Arbitrary Form in a Homogeneous Medium at Low Pressure. A. G. Doroshkevich and Ya. B. Zel'dovich (T) - 615

Crab Nebula
An Analysis of Some Mechanisms for the Development of Magnetic Fields in Radio Sources. S. B. Pikel'ner (T) - 463
Distribution of Polarized and Nonpolarized Radiation in the Crab Nebula. N. S. Soboleva, V. A. Prozorov, and Yu. N. Pariiskii (E) - 1
Infrated Observations of the Crab Nebula. V. I. Moroz (E/T) - 755
Observations of Discrete Radio Sources at 3.2 cm. V. F. Zakharenkov, N. L. Kaidanovskii, Yu. N. Pariiskii, and V. A. Prozorov (E) - 167
Precise Absolute Measurements of the Flux Density of the Crab and Orion Nebulae at 3.2 cm. V. S. Lazarevskii, K. S. Stankevich, and V. S. Troitskii (E) - 8

Dynamics of Stellar Systems
Spherical Star Clusters in a Quasi-Stationary State. T. A. Agekyan (T) - 243
The Dynamics of the Nonstationary Galaxy. I. I. Genkin (T) - 239

Earth, Atmosphere
Air Currents in the Meteor Zone According to Radio Echo Observations. I. A. Lyzenko (E) - 121
A Table for the Reduction of Photometric Observations of the Zodiacal Light for the Effect of Tropospheric Scattering. V. G. Fesenkov (T/E) - 670
Influence of Atmospheric Pressure on the Half-Width of the Oxygen Line in the 1.27-μ Band. N. I. Kozhevnikov, E. A. Makarova, and G.F. Sitnik (E) - 835
Isophotes of Zodiacal Light from Observations Made in Egypt during the Autumn of 1957. V. G. Fesenkov (E/T) - 829
Latitude and Height Dependence of Atmospheric Disturbances Caused by Type M Solar Corpuscular Streams. B. D. Fomenko, I. V. Bonelis, and V. V. Kubyshkin (E) - 534
Notes on the Theory of Ionization of Meteor Trails. III. Ionization Due to Air Molecules and Atoms Reflected from a Meteoroid. A. M. Furman (T/E) - 559
The Effect of Water Vapor on the Optical Properties of the Atmosphere. E. A. Makarova, G. F. Sitnik, and N. I. Kozhevnikov (T/E) - 411
Two-Body Motion with Corpuscular Radiation. T. B. Omarov (T) - 707

Earth, Rotation
Determination of Diurnal Nutation from Observation of Bright Zenith Stars at Poltava. N. A. Popov (E) - 422
The Determination of Latitude Variations from Observations of Zenith Program Stars. S. V. Drozdov (T) - 427
The Discovery of the Earth's Diurnal Nutation. N. N. Pariiskii (T/E) - 424

Eclipse, Solar
Relative Spectrophotometric Measurements of Certain Solar Chromospheric Lines Observed during the Total Solar Eclipse of February 15, 1961. A. I. Stolov (E) - 532

Envelopes, Stellar
Emission Profiles Formed in Moving Stellar Envelopes. II. Outflow at a Radially Decreasing Speed. S. V. Rublev (T) - 492
Structure and Far Ultraviolet Radiation of the Upper Stellar Atmosphere. I. Continuous Emission of Hydrogen and Helium. G. M. Nikol'skii (T) - 512
The Investigation of the N III Recombination Spectrum in Stellar Envelopes and Nebulae. VI. The Equations of Statistical Equilibrium for the Lower Excited Levels of C II, N III, and O IV. A. A. Nikitin and O. A. Yakubovskii (T/E) - 189
Ultraviolet Emission Lines in the Envelope of β Lyrae. V. Ya. Alduseva and I. N. Glushneva (E) - 519

Galaxies, Distances
Distance Moduli of the Nearest Galaxies, Derived from Cepheids. Yu. P. Pskovskii (E) - 293

Photometric Distances to Galaxies and the Red Shift. A. V. Zasov (E) - 659

Galaxies, Peculiar
Luminosity Variations of the Object Identified with the Radio Source ZS 273. A. S. Sharov and Yu. N. Efremov (E) - 727

Galaxies, Structure
Obscuring Matter in Galaxies. B. A. Vorontsov-Vel'yaminov (T/E) - 63
On the Analogy Between the Structure of the Solar System and the Structure of the Galaxy and Other Spirals. M. S. Éigenson (T/E) - 106

Galaxy (Milky Way), Rotation, K-Effect
A Determination of the Solar Velocity Relative to Stars of Various Spectral Types and Luminoisity Classes. E. D. Pavlovskaya (E) - 849

Galaxy (Milky Way), Spectrophotometry
A Reappraisal of Interstellar Light Absorption in the Galaxy. A. S. Sharov (E) - 689
Results of a Spectrophotometric Study of Southern Milky Way Regions. E. B. Kostyakova (E) - 586

Galaxy (Milky Way), Structure, Spiral Arms
Absorption of the Radiation from the Source Sagittarius-A by Interstellar Neutral Hydrogen. N. F. Ryzhkova, T. M. Egorova, L. V. Gosachinskii, and N. V. Bystrova (E) - 12
On the Analogy Between the Structure of the Solar System and the Structure of the Galaxy and Other Spirals. M. S. Éigenson (T/E) - 106
The Distribution of Early-Type Stars Throughout the Galaxy. L. L. Pronik and V. L. Pronik (T/E) - 70
The Possible Role of the Intergalactic Medium in Maintaining Gas Motions in the Halo. V. M. Byakov (T) - 291
The Thickness of the Gas Disk of the Galaxy from 21-cm Observations. T. A. Lozinskaya and N. S. Kardashev (E) - 161
The Two-Color Diagram and the Galactic Distribution of Open Clusters. W. Schöneich and N. S. Nikolow (E) - 407
21-cm Observations of the Radio Source Sagittarius A. T. M. Egorova (E) - 290

Gas Dynamics
The Development of Perturbations of Arbitrary Form in a Homogeneous Medium at Low Pressure. A. G. Doroshkevich and Ya. B. Zel'dovich (T) - 615
The Possible Role of the Intergalactic Medium in Maintaining Gas Motions in the Halo. V. M. Byakov (T) - 291

Geodesy
Determination of the Earth's Topographic Surface with a Relative Error of the Order of the Square of the Oblateness of the Earth's Ellipsoid. L. F. Monin (T) - 435
On the Computation of the Plumb Deflection. L. F. Monin (T) - 136

Geomagnetic Activity (see Solar-Terrestrial Relationships)

Gravitational Instability
Plasma Phenomena and Supernova Outbursts. A. D. Frank-Kamenetskii (T) - 349
Stability Criterion for Hydrostatic Equilibrium. G. F. Sitnik (T) - 319
The Development of Perturbations of Arbitrary Form in a Homogeneous Medium at Low Pressure. A. G. Doroshkevich and Ya. B. Zel'dovich (T) - 615
Theory of the Magnetogravitational Instability of a Sphere with Variable Density. V. A. Vardanyan and R. S. Oganesyan (T) - 572

Helium, in Solar Atmosphere
The Structure of the Solar Atmosphere in Active and Undisturbed Regions. Ionization of Hydrogen and Helium. R. A. Gulyaev, K. L. Nikol'skaya, and G. M. Nikol'skii (T/E) - 332

Helium, in Stellar Atmospheres
Structure and Far Ultraviolet Radiation of the Upper Stellar Atmosphere. I. Continuous Emission of Hydrogen and Helium. G. M. Nikol'skii (T) - 512
Ultraviolet Emission Lines in the Envelope of β Lyrae. V. Ya. Alduseva and L. N. Glushneva (E) - 519

Hydrodynamics (see also Cosmic Electrodynamics)
Stability Criterion for Hydrostatic Equilibrium. G. F. Sitnik (T) - 319

Hydrogen, Ionized, H II Regions
Origin of Cometary Nebulae. II. É. A. Dibai (T) - 606
The Mass of Filamentary Nebulae (The Loop) in Cygnus. G. B. Sholomitskii (E) - 172
The Role of Radiation Pressure in the Dynamics of Planetary Nebulae. G. S. Khromov (T) - 609

Hydrogen, Neutral H I Regions
Absorption of the Radiation from the Source Sagittarius-A by Interstellar Neutral Hydrogen. N. F. Ryzhkova, T. M. Egorova, L. V. Gosachinskii, and N. V. Bystrova (E) - 12
The Mass of the Filamentary Nebulae (The Loop) in Cygnus. G. B. Sholomitskii (E) - 172
The Role of Radiation Pressure in the Dynamics of Planetary Nebulae. G. S. Khromov (T) - 609
The Structure of the Solar Atmosphere in Active and Undisturbed Regions. Ionization of Hydrogen and Helium. R. A. Gulyaev, K. L. Nikol'skaya, and G. M. Nikol'skii (T/E) - 332

Hydrogen, Spectral Lines
The Difference between the H_α and H_β Line Profiles

of a Facula and the Photosphere. O. N. Mitropol'skaya (T/E) - 328

Hydrogen, in Stellar Atmospheres

Chemical Composition of Nova Shells. I. Methods for Estimating the Electron Concentration in Nova Atmospheres Near Maximum Light. É. R. Mustel' (T/E) - 772

Structure and Far Ultraviolet Radiation of the Upper Stellar Atmosphere. I. Continuous Emission of Hydrogen and Helium. G. M. Nikol'skii (T) - 512

Infrared, Observations in

Infrared Observations of the Crab Nebula. V. I. Moroz (E/T) - 755

New Data on the Structure of the Lunar Surface. N. F. Kuprevich (E) - 677

Radiation Emission from the Orion Nebula in the 0.85-1.7μ Wavelength Region. V. I. Moroz (E)-601

The Infrared Spectrum of Venus (1-2.5 μ). V. I. Moroz (E) - 109

Instruments and Accessories

Absolute Measurements of Solar Energy in the Spectral Region 3382-10,000 A. M. S. Murasheva and G. F. Sitnik (E) - 623

An Intensity-Recording Microphotometer. N. D. Kalinenkov and A. I. Stolov (E) - 129

On the Theory of Wide Scale Pairs. A. A. Gurshtein (T/E) - 134

Interstellar and Intergalactic Medium

Absorption of the Radiation from the Source Sagittarius-A by Interstellar Neutral Hydrogen. N. F. Ryzhkova, T. M. Egorova, I. V. Gosachinskii, and N. V. Bystrova (E) - 12

A Reappraisal of Interstellar Light Absorption in the Galaxy. A. S. Sharov (E) - 689

Cosmic Rays in Metagalactic Space. V. L. Ginzburg and S. I. Syrovatskii (T) - 357

Reddening Curves in the U. B. V. System. V. Straižys (E/T) - 699

The Possible Role of the Intergalactic Medium in Maintaining Gas Motions in the Halo. V. M. Byakov (T) - 291

The Thickness of the Gas Disk of the Galaxy from 21-cm Observations. T. A. Lozinskaya and N. S. Kardashev (E) - 161

Latitude and Longitude

Averaging the Measured Heights of Celestial Bodies. R. V. Kunitskii (T) - 583

Determination of Diurnal Nutation from Observation of Bright Zenith Stars at Poltava. N. A. Popov (E) - 422

Re-evaluation of the Struve Method for Determining Latitude from Transit Observations in the Prime Vertical. V. V. Nesterov (E) - 283

The Determination of Latitude Variations from Observations of Zenith Program Stars. S. V. Drozdov (T) - 427

The Discovery of the Earth's Diurnal Nutation. N. N. Pariiskii (T/E) - 424

The Possible Influence of Lateral Refraction on Observational Results. P. P. Loginov (T) -723

Letters to the Editor

Comments on Zhevakin's Paper "One Common Error in the Theory of Stellar Variability". John P. Cox and Charles A. Whitney (T) - 139

Letter to the Editor. R. N. Ikhsanov (T/E) - 593

The Incorrectness of Cox and Whitney's Simplified Criterion for the Pulsational Instability of a Star. S. A. Zhevakin (T) - 142

Light Pressure

The Role of Radiation Pressure in the Dynamics of Planetary Nebulae. G. S. Khromov (T) - 609

Meteoric Material in Solar System

Density of Meteoric Matter in the Vicinity of Earth's Orbit, from Radar Observations of Meteors. V. N. Lebedinets (T/E) - 549

Lunar Effects on Zodiacal Brightness. N. B. Divari (E) - 547

Motion of the Jacobini-Zinner Comet from 1933 to 1946. Yu. V. Evdokimov (T/E) - 415

Photoelectric Observations of Zodiacal Light from a High-Altitude Observatory. N. B. Divari and S. N. Krylova (E) - 391

Meteorites

The Height of the Explosion of the Tunguska Meteorite. K. G. Ivanov (T) - 251

Meteors, Radar Observation

Air Currents in the Meteor Zone According to Radio Echo Observations. I. A. Lysenko (E) - 121

Density of Meteoric Matter in the Vicinity of the Earth's Orbit, from Radar Observations of Meteors. V. N. Lebedinets (T/E) - 549

Meteors, Trails

Fragmentation of Meteoric Bodies. B. Yu. Levin (E/T) - 233

Notes on the Theory of Ionization of Meteor Trails. III. Ionization Due to Air Molecules and Atoms Reflected from a Meteoroid. A. M. Furman (T/E) - 559

Moon, Motion

Influence of the Figure of the Moon on Its Motion. V. T. Kondurar' (T) - 576

Moon, Origin

On the Origin of the Moon. II. The Growth of the Moon in the Circumterrestrial Swarm of Satellites. E. L. Ruskol (T) - 221

Moon, Properties of Surface
Albedo Values for Separate Features of the Lunar Surface. N. N. Sytinskaya (T/E) - 827
Detecting Heat Flow from the Interior of the Moon. V. D. Krotikov and V. S. Troitskii (T/E) - 822
Nature of the Lunar Surface Layer. B. Yu. Levin (T/E) - 818
New Data on the Structure of the Lunar Surface. N. F. Kuprevich (E) - 677
The Heat Balance of the Lunar Surface Layer During a Lunation. V. D. Krotikov and O. B. Shchuko (T/E) - 228
Thermal Conductivity of Lunar Material from Precise Measurements of Lunar Radio Emission. V. D. Krotikov and V. S. Troitskii (E) - 119

Nebulae, Cometary and Planetary
Origin of Cometary Nebulae. II. É. A. Dibai (T) - 606
Radiation Emission from the Orion Nebula in the 0.85-1.7 μ Wavelength Region. V. I. Moroz (E) - 601
The Investigation of the N III Recomgination Spectrum in Stellar Envelopes and Nebulae. VI. The Equations of Statistical Equilibrium for the Lower Excited Levels of C II, N III, and O IV. A. A. Nikitin and O. A. Yakubovskii (T/E) - 189
The Role of Radiation Pressure in the Dynamics of Planetary Nebulae. G. S. Khromov (T) - 609

Nebulae, Diffuse
Radiation Emission from the Orion Nebula in the 0.85-1.7 μ Wavelength Region. V. I. Moroz (E) - 601
The Mass of the Filamentary Nebulae (The Loop) in Cygnus. G. B. Sholomitskii - 172

Nebulae, Supernova Remnants
An Analysis of Some Mechanisms for the Development of Magnetic Fields in Radio Sources. S. B. Pikel'ner (T) - 463
Distribution of Polarized and Nonpolarized Radiation in the Crab Nebula. N. S. Soboleva, V. A. Prozorov, and Yu. N. Pariiskii (E) - 1
Precise Absolute Measurements of the Flux Density of the Crab and Orion Nebulae at 3.2 cm. V. S. Lazarevskii, K. S. Stankevich, and V. S. Troitskii (E) - 8
The Evolution of Supernova Remnants of the Type of Cassiopeia-A: Changes in the Spectral Index of Radio Emission. Yu. P. Pskovskii (T/E) - 17
The Mass of the Filamentary Nebulae (The Loop) in Cygnus. G. B. Sholomitskii (E) - 172
The Pulsation of Rotating Stars. V. V. Porfir'ev (T) - 441

Novae, Envelopes
Abundances of Nitrogen and Oxygen in the Envelopes of Novae. V. G. Gorbatskii and A. A. Nikitin (E/T) - 656
Chemical Composition of Nova Shells. I. Methods for Estimating the Electron Concentration in Nova Atmospheres Near Maximum Light. É. R. Mustel' (T/E) - 772

Novae, Outbursts
Neutrino Radioactivity and Its Role in Astrophysical Processes. V. N. Baier and L. B. Khriplovich (T) - 599
The Spectrum of Nova Herculis 1963. M. Ya. Orlov and M. G. Rodriges (E) - 729

Novae, Positions and Proper Motions
Positions and Proper Motions of Several Novae. N. M. Artyukhina (E) - 522

Nuclear Reactions
Neutrino Radioactivity and Its Role in Astrophysical Processes. V. N. Baier and L. B. Khriplovich (T) - 599
The Origin of Heavier-Than-Calcium Elements. G. S. Malkiél' (T) - 207

Obituary
Otto Struve, 1897-1963. B. V. Kukarkin and P. G. Kulikovskii (R) - 859

Orbits, Theory and Computation
A New Determination of the Orbital Elements of Seven Visual Binaries. A. V. Bespalov (T/E) - 733
Gravitational Spheres of the Major Planets, Moon and Sun. G. A. Chebotarev (T) - 618
Motion of the Jacobini-Zinner Comet from 1933 to 1946. Yu. V. Evdokimov (T/E) - 415
The Generalized Problem of Motion About Two Fixed Centers and Its Application to the Theory of Artificial Earth Satellites. E. P. Aksenov, E. A. Grebenikov, and V. G. Demin (T) - 276
Two-Body Motion with Corpuscular Radiation. T. B. Omarov (T) - 707

Photographic Observations
Conference on Photographic Methods of Observing Artificial Earth Satellites. M. L. Illenko (R) - 154
Influence of Atmospheric Dispersion on Photographic Star Positions. L. A. Golovina (T/E) - 720
Positions and Proper Motions of Several Novae. N. M. Artyukhina (E) - 522
Some Features of the Martian Polar Caps and the Hypothesis that They Arise from Photographic Irradiation. N. N. Sytinskaya (E) - 541
The Open Cluster M 37 and the Coronas of Star Clusters. N. M. Artyukhina and P. N. Kholopov (E) - 840

Photometry
Absolute Measurements of Solar Energy in the Spectral Region 3382-10,000 A. M. S. Murasheva and G. F. Sitnik (E) - 623
Albedo Values for Separate Features of the Lunar Surface. N. N. Sytinskaya (T/E) - 827
A Table for the Reduction of Photometric Observations of the Zodiacal Light for the Effect of Tropo-

spheric Scattering. V. G. Fesenkov (T/E) - 670
Facula-Photosphere Contrast in the Region λλ6700-21,000 A. V. G. Kuz'minykh and G. F. Sitnik (E) - 730
Infrared Observations of the Crab Nebula. V.I. Moroz (E/T) - 755
Isophotes of Zodiacal Light from Observations Made in Egypt during the Autumn of 1957. V. G. Fesenkov (E/T) - 829
Photoelectric Observations of Zodiacal Light from a High-Altitude Observatory. N. B. Divari and S. N. Krylova (E) - 391
Photometric Distances to Galaxies and the Red Shift. A. V. Zasov (E) - 659
Some Features of the Martian Polar Caps and the Hypothesis that They Arise from Photographic Irradiation. N. N. Sytinskaya (E) - 541
The Relation between Photometric Systems. V. Straizhis (T) - 253

Planets and Satellites, Atmospheres
Influence of Atmospheric Pressure on the Half-Width of the Oxygen Line in the 1.27-μ Band. N. I. Kozhevnikov, E. A. Makarova, and G. F. Sitnik (E) - 835
The Infrared Spectrum of Venus (1-2.5 μ). V. I. Moroz (E) - 109
The Theory of Radiation Scattering in Planetary Atmospheres. L. N. Minin and V. V. Sobolev (T) - 379

Planets and Satellites, Motions of
Gravitational Spheres of the Major Planets, Moon and Sun. G. A. Chebotarev (T) - 618
The Derivation of the Period and Direction of Rotation of Venus from Radio Observations. A. D. Kuz'min and A. E. Salomonovich (E/T) - 116

Planets and Satellites, Observations of
Some Features of the Martian Polar Caps and the Hypothesis that They Arise from Photographic Irradiation. N. N. Sytinskaya (E) - 541

Polarization and Polarimetry
Distribution of Polarized and Nonpolarized Radiation in the Crab Nebula. N. S. Soboleva, V. A. Prozorov, and Yu. N. Pariiskii (E) - 1
Investigation of the Polarization of Radiation of Variable Stars. I. N. M. Shakhovskoi (E/T) - 806
Isophotes of Zodiacal Light from Observations Made in Egypt during the Autumn of 1957. V. G. Fesenkov (E/T) - 829
Measurement of the Magnitude and Direction of the Magnetic Field in the Region of Sunspots. B. A. Ioshpa and V. N. Obridko (E) - 776
Polarimetric Observations of the Magnetic Variable HD 215441. N. S. Polosukhina (E) - 498

Practical Astronomy
Albedo Values for Separate Features of the Lunar Surface. N. N. Sytinskaya (T/E) - 827
An Intensity-Recording Microphotometer. N. D. Kalinenkov and A. L. Stolov (E) - 129
A Reclassification of Galactic Supernovae, with Tentative Identifications of the 1928 and 902 Outbursts. Yu. P. Pskovskii (E) - 501
A Table for the Reduction of Photometric Observations of the Zodiacal Light for the Effect of Tropospheric Scattering. V. G. Fesenkov (T/E) - 670
Averaging the Measured Heights of Celestial Bodies. R. V. Kunitskii (T) - 583
Correction of Photometric Observations of the Zodiacal Light for Tropospheric Scattering. V. G. Fesenkov (T/E) - 23
Dependence of the Contrast of Faculae on Wavelength. Determination of the Spectrophotometric Temperatures of Faculae. V. D. Kuz'minykh (T/E) -323
Determination of Diurnal Nutation from Observation of Bright Zenith Stars at Poltava. N. A. Popov (E) - 422
Extra-Atmospheric Spectrophotometric Standards. Energy Distribution in the Spectra of Selected Stars in CGS Units. A. V. Kharitonov (E) - 258
Influence of Atmospheric Dispersion on Photographic Star Positions. L. A. Golovina (T/E) - 720
Lunar Effects on Zodiacal Brightness. N. B. Divari (E) - 547
Motion of the Jacobini-Zinner Comet from 1933 to 1946. Yu. V. Evdokimov (T/E) - 415
Observations at Kiev of Comet Seki-Lines 1962. S. K. Vsekhsvyatskii (E) - 133
On the Theory of Wide Scale Pairs. A. A. Gurshtein (T/E) - 134
Photoelectric Observations of Zodiacal Light from a High-Altitude Observatory. N. B. Divari and S. N. Krylova (E) - 391
Polarimetric Observations of the Magnetic Variable HD 215441. N. S. Polosukhina (E) - 498
Positions and Proper Motions of Several Novae. N. M. Artyukhina (E) - 522
Re-evaluation of the Struve Method for Determining Latitude from Transit Observations in the Prime Vertical. V. V. Nesterov (E) - 283
Relative Spectrophotometric Measurements of Certain Solar Chromospheric Lines Observed During the Total Solar Eclipse of February 15, 1961. A. L. Stolov (E) - 532
Some Features of the Martian Polar Caps and the Hypothesis that They Arise from Photographic Irradiation. N. N. Sytinskaya (E) - 541
Statistical Analysis of Errors in the Determination of the Radial Velocities of Stars Belonging to Late Spectral Classes. T. S. Kirillova and E. D. Pavlovskaya (T/E) - 99
The Constant of Aberration and the Solar Parallax. A. A. Mikhailov (E) - 737

The Determination of Latitude Variations from Observations of Zenith Program Stars. S. V. Drozdov (T) - 427
The Discovery of the Earth's Diurnal Nutation. N. N. Pariiskii (T/E) - 424
The Effect of Water Vapor on the Optical Properties of the Atmosphere. E. A. Makarova, G. F. Sitnik, and N. L. Kozhevnikov (T/E) - 411
The Possible Influence of Lateral Refraction on Observational Results. P. P. Loginov (T) - 723
The Possible Role of the Intergalactic Medium in Maintaining Gas Motions in the Halo. V. M. Byakov (T) - 291
The Relation between Photometric Systems. V. Straizhis (T) - 253
Ultraviolet Emission Lines in the Envelope of β Lyrae. V. Ya. Alduseva and L. N. Glushneva (E) - 519

Radiation, and Gas Dynamics
Radiative Transfer in the Continuous Spectrum in the Absence of Thermal Equilibrium. D. A. Frank-Kamenetskii (T) - 182

Radiation, Nonthermal
Radiative Transfer in the Continuous Spectrum in the Absence of Thermal Equilibrium. D. A. Frank-Kamenetskii (T) - 182

Radiation, Scattering
Diffusion of Resonance Radiation in Stellar and Nebular Atmospheres. II. A Layer of Finite Thickness. V. V. Ivanov (T) - 199
The Theory of Radiation Scattering in Planetary Atmospheres. L. N. Minin and V. V. Sobolev (T) - 379

Radiation, Transport
Diffusion of Resonance Radiation in Stellar and Nebular Atmospheres. II. A Layer of Finite Thickness. V. V. Ivanov (T) - 199
Radiative Transfer in the Continuous Spectrum in the Absence of Thermal Equilibrium. D. A. Frank-Kamenetskii (T) - 182
The Third Plenum of the Commission on the Physics of Stars and Nebulae. V. V. Ivanov (R) - 304
The Theory of Radiation Scattering in Planetary Atmospheres. I. N. Minin and V. V. Sobolev (T) - 379

Radio Astronomy, in Australia
Radio Astronomy in Australia. V. V. Vitkevich (R) - 449

Radio Astronomy, Discrete Sources
Absorption of the Radiation from the Source Sagittarius-A by Interstellar Neutral Hydrogen. N. F. Ryzhkova, T. M. Egorova, L. V. Gosachinskii, and N. V. Bystrova (E) - 12
A Reclassification of Galactic Supernovae, with Tentative Identifications of the 1928 and 902 Outbursts. Yu. P. Pslovskii (E) - 501
Distribution of Polarized and Nonpolarized Radiation in the Crab Nebula. N. S. Soboleva, V. A. Prozorov, and Yu. N. Pariiskii (E) - 1
Nature of Jets in Radio Galaxies. I. S. Shklovskii (T/E) - 748
Nature of the Radio Galaxy Cygnus A. N. S. Kardashev (T/E) - 740
Observations of Discrete Radio Sources at 3.2 cm. V. F. Zakharenkov, N. L. Kaidanovskii, Yu. N. Pariiskii, and V. A. Prozorov (E) - 167
Precise Absolute Measurements of the Flux Density of the Crab and Orion Nebulae at 3.2 cm. V. S. Lazarevskii, K. S. Stankevich, and V. S. Troitskii (E) - 8
The Determination of Distances to Radio Sources. R. D. Dagkesamanskii and A. A. Korchak (T) - 443
The Evolution of Supernova Remnants of the Type of Cassiopeia-A: Changes in the Spectral Index of Radio Emission. Yu. P. Pskovskii (T/E) - 17
The Possible Influence of Lateral Refraction on Observational Results. P. P. Loginov (T) - 723
21-cm Observations of the Radio Source Sagittarius A. T. M. Egorova (E) - 290

Radio Astronomy, Emission Mechanism
Nature of Jets in Radio Galaxies. I. S. Shklovskii (T/E) - 748
Nature of the Radio Galaxy Cygnus A. N. S. Kardashev (T/E) - 740
Synchrotron Radiation of Charged Particles in a Dipole Magnetic Field. I. A. A. Korchak (T/E) - 764
The Evolution of Supernova Remnants of the Type of Cassiopeia-A: Changes in the Spectral Index of Radio Emission. Yu. P. Pskovskii (T/E) -17
The Frequency Spectrum of the Slowly Varying Component of Solar Radio Emission. V. V. Zheleznyakov (T/E) - 630
The Mechanism of Type II Bursts of Solar Radio Emission. S. B. Pikel'ner and M. A. Gintsburg (T) - 639
The Nature of P_I Type Peaks. V. E. Chertoprud (E/T) - 35

Radio Astronomy, Galaxy
Absorption of the Radiation from the Source Sagittarius-A by Interstellar Neutral Hydrogen. N. F. Ryzhkova, T. M. Egorova, L. V. Gosachinskii, and N. V. Bystrova (E) - 12

Radio Astronomy, Meteors
Air Currents in the Meteor Zone According to Radio Echo Observations. I. A. Lysenko (E) - 121
Density of Meteoric Matter in the Vicinity of the Earth's Orbit, from Radar Observations of Meteors. V. N. Lebedinets (T/E) - 549

Radio Astronomy, Polarization
Distribution of Polarized and Nonpolarized Radiation in the Crab Nebula. N. S. Soboleva, V. A. Prozorov, and Yu. N. Pariiskii (E) - 1
Polarization of Radio Waves Passing through a Transverse Magnetic Field Region in the Solar Corona. V. V. Zheleznyakov and E. Ya. Zlotnik (T/E)- 485
Synchrotron Radiation of Charged Particles in a Dipole Magnetic Field. I. A. A. Korchak (T/E) - 764

Radio Astronomy, Solar System
Detecting Heat Flow from the Interior of the Moon. V. D. Krotikov and V. S. Troitskii (T/E) - 822
Interaction between Solar Corpuscular Streams and Cometary Atmospheres. II. "Collapsing" Envelopes. Radio-Frequency Emission. I. S. Marochnik (T/E) - 384
The Derivation of the Period and Direction of Rotation of Venus from Radio Observations. A. D. Kuz'min and A. E. Salomonovich (E/T) - 116

Radio Astronomy, Spectra of Sources
The Evolution of Supernova Remnants of the Type of Cassiopeia-A: Changes in the Spectral Index of Radio Emission. Yu. P. Pskovskii (T/E) - 17

Radio Astronomy, Sun
Radio Emission from Solar Active Regions in the Millimeter Region. A. G. Kislyakov and A. E. Salomonovich (E) - 177
Polarization of Radio Waves Passing through a Transverse Magnetic Field Region in the Solar Corona. V. V. Zheleznyakov and E. Ya. Zlotnik (T/E)- 485
The Frequency Spectrum of the Slowly Varying Component of Solar Radio Emission. V. V. Zheleznyakov (T/E) - 630
The Nature of P_I Type Peaks. V. E. Chertoprud (E/T) 35

Radio Astronomy, 21-cm Radiation
Absorption of the Radiation from the Source Sagittarius-A by Interstellar Neutral Hydrogen. N. F. Ryzhkova, T. M. Egorova, I. V. Gosachinskii, and N. V. Bystrova (E) - 12
The Mass of the Filamentary Nebulae (The Loop) in Cygnus. G. B. Sholomitskii (E) - 172
The Thickness of the Gas Disk of the Galaxy from 21-cm Observations. T. A. Lozinskaya and N. S. Kardashev (E) - 161
21-cm Observations of the Radio Source Sagittarius A. T. M. Egorova (E) - 290

Refraction, Atmospheric
The Possible Influence of Lateral Refraction on Observational Results. P. P. Loginov (T) - 723

Relativity and Gravitation (see Cosmogony and Cosmology)

Shock Waves
Investigation of the Polarization of Radiation of Variable Stars. I. N. M. Shakhovskoi (E/T) -806
Origin of Cometary Nebulae. II. É. A. Dibai (T)- 606
The Mechanism of Type II Bursts of Solar Radio Emission. S. B. Pikel'ner and M. A. Gintsburg (T) - 639

Solar System (Analogy with Galaxy)
On the Analogy Between the Structure of the Solar System and the Structure of the Galaxy and Other Spirals. M. S. Éigenson (T/E) - 106

Solar-Terrestrial Relationships
Latitude and Height Dependence of Atmospheric Disturbances Caused by Type M Solar Corpuscular Streams. B. D. Fomenko, L. V. Bonelis, and V. V. Kubyshkin (E) - 534

Spectra, Atomic and Molecular
Cause of Ionization of Cometary Molecules. I. S. Marochnik (T/E) - 544
Emission Spectra of Rarefield Molecular Gases Excited by a Mixed Beam of Protons and Hydrogen Atoms. G. N. Polyakova, Ya. M. Fogel', and Ch'iu Yu-mei (E) - 267
Properties of the Lower Excited Levels of Atoms in Some Isoelectronic Sequences Which Include Coronal Ions. A. A. Nikitin (T) - 785
The Infrared Spectrum of Venus (1-2.5 μ). V. I. Moroz (E) - 109
The Investigation of the N III Recombination Spectrum in Stellar Envelopes and Nebulae. VI. The Equations of Statistical Equilibrium for the Lower Excited Levels of C II, N III, and O IV. A. A. Nikitin and O. A. Yakubovskii (T/E) - 189

Spectra, Infrared of Venus
The Infrared Spectrum of Venus (1-2.5 μ). V. I. Moroz (E) - 109

Spectra, Line Profiles
Determination of the Chemical Composition of the Solar Atmosphere. R. B. Teplitskaya and V. A. Vorob'eva (E/T) - 778
Determination of the Earth's Topographic Surface with a Relative Error of the Order of the Square of the Oblateness of the Earth's Ellipsoid. I. F. Monin (T) - 435
Displacement and Broadening of Fraunhofer Lines. I. The Rotational Velocity of the Sun at the Equator. I. A. Aslanov (E/T) - 794
Emission Profiles Formed in Moving Stellar Envelopes. II. Outflow at a Radially Decreasing Speed. S. V. Rublev (T) - 492
Influence of Atmospheric Pressure on the Half-Width of the Oxygen Line in the 1.27-μ Band. N. I. Kozhevnikov, E. A. Makarova, and G. F. Sitnik (E)- 835

Spectra, of Nebulae
The Investigation of the N III Recombination Spectrum in Stellar Envelopes and Nebulae. VI. The Equations of Statistical Equilibrium for th Lower Excited Levels of C II, N III, and O IV. A. A. Nikitin and O. A. Yakubovskii (T/E) - 189

Spectra, Solar
A Spectrophotometric Study of Four Bright Prominences. N. A. Yakovkin and M. Yu. Zel'dina (E) - 643
Relative Spectrophotometric Measurements of Certain Solar Chromospheric Lines Observed During the Total Solar Eclipse of February 15, 1961. A. L. Stolov (E) - 532
The Difference between the H_α and H_β Line Profiles of a Facula and the Photosphere. O. N. Mitropol'skaya (T/E) - 328

Spectra, Stellar
Abundances of Nitrogen and Oxygen in the Envelopes of Novae. V. G. Gorbatskii and A. A. Nikitin (E/T) - 656
Luminosity Variations of the Object Identified with the Radio Source ZS 273. A. S. Sharov and Yu. N. Efremov (E) - 727
Photometry of the Continuous Spectrum of P Cygni Type Stars. V. P. Arkhipova (T/E) - 51

Spectrophotometry
An Evolutionary Interpretation of the H-R Diagram for the Orion-Nebula Cluster. A. G. Masevich and É. V. Kotok (E/T) - 505
A Spectrophotometric Study of Four Bright Prominences. N. A. Yakovkin and M. Yu. Zel'dina (E) - 643
A Study of the Globular Cluster M 13. Z. L Kadla (E) - 528
Dependence of the Contrast of Faculae on Wavelength. Determination of the Spectrophotometric Temperatures of Faculae. V. D. Kuz'minykh (T/E) - 323
Determination of the Stellar Magnitude of the Sun in Tricolor Systems Based on Absolute Spectrophotometric Measurements. Z. V. Karyagina and A. V. Kharitonov (E) - 857
Extra-Atmospheric Spectrophotometric Standards. Energy Distribution in the Spectra of Selected Stars in CGS Units. A. V. Kharitonov (E) - 258
Photometry of the Continuous Spectrum of P Cygni Type Stars. V. P. Arkhipova (T/E) - 51
Reddening Curves in the U, B. V. System. V. Straižys (E/T) - 699
Results of a Spectrophotometric Study of Southern Milky Way Regions. E. B. Kostyakova (E) - 586
Spectrophotometric Temperatures, Absolute Magnitudes, and Intrinsic Color Indices of Wolf-Rayet Stars. S. V. Rublev (E) - 75
The Relation between Photometric Systems. V. Straizhis (T) - 253
The Two-Color Diagram and the Galactic Distribution of Open Clusters. W. Schöneich and N. S. Nikolow (E) - 407

Star Counts
Density Distribution of Bright Stars in M 2, with Remarks on the Dynamical Evolution of Globular Clusters. P. N. Kholopov (E) - 89
Stellar Density Distribution in the Globular Cluster M 15. P. N. Kholopov (E) - 399
The Distribution of Early-Type Stars Throughout the Galaxy. L L Pronik and V. L Pronik (T/E) -70
The Open Cluster M 37 and the Coronas of Star Clusters. N. M. Artyukhina and P. N. Kholopov (E) - 840

Stars, Absolute Magnitudes
A Determination of the Dispersion of the Absolute Magnitudes of P Cygni Type Stars. V. P. Arkhipova (E) - 686
Spectrophotometric Temperatures, Absolute Magnitudes, and Intrinsic Color Indices of Wolf-Rayet Stars. S. V. Rublev (E) - 75
The Period-Luminosity Relation for Short-Period Cepheids. M. S. Frolov (E/T) - 86

Stars, Atmospheres
Boundary Conditions at the Surface of Star Models. G. V. Ruben (T/E) - 649
Estimate of the Electron Densities in Stellar Chromospheres. M. A. Livshits (T/E) - 813
Structure and Far Ultraviolet Radiation of the Upper Stellar Atmosphere. I. Continuous Emission of Hydrogen and Helium. G. M. Nikol'skii (T) - 512

Stars, Color Indices
Extra-Atmospheric Spectrophotometric Standards. Energy Distribution in the Spectra of Selected Stars in CGS Units. A. V. Kharitonov (E) - 258
Reddening Curves in the U, B. V. System. V. Straižys (E/T) - 699
Spectrophotometric Temperatures, Absolute Magnitudes, and Intrinsic Color Indices of Wolf-Rayet Stars. S. V. Rublev (E) - 75

Stars, and Emission Nebulae
Origin of Cometary Nebulae. II. É. A. Dibai (T) - 606

Stars, Multiple
A New Determination of the Orbital Elements of Seven Visual Binaries. A. V. Bespalov (T/E) -733
Spectrophotometric Temperatures, Absolute Magnitudes, and Intrinsic Color Indices of Wolf-Rayet Stars. S. V. Rublev (E) - 75

Stars, Positions and Proper Motions
A Determination of the Solar Velocity Relative to Stars of Various Spectral Types and Luminoisity Clas-

ses. E. D. Pavlovskaya (E) - 849
A Study of the Globular Cluster M 13. Z. L. Kadla (E) - 528
Influence of Atmospheric Dispersion on Photographic Star Positions. L. A. Golovina (T/E) - 720
Statistical Analysis of Errors in the Determination of the Radial Velocities of Stars Belonging to Late Spectral Classes. T. S. Kirillova and E. D. Pavlovskaya (T/E) - 99

Stars, Rotation
Note on the Nature of β C Ma Variables. G. T. Oliinik and V. V. Porfir'ev (T) - 588
The Pulsation of Rotating Stars. V. V. Porfir'ev (T) - 441

Stars, Spectra, Ultraviolet
Structure and Far Ultraviolet Radiation of the Upper Stellar Atmosphere. I. Continuous Emission of Hydrogen and Helium. G. M. Nikol'skii (T) - 512

Stars, Structure and Evolution
An Evolutionary Interpretation of the H-R Diagram for the Orion-Nebula Cluster. A. G. Masevich and É. V. Kotok (E/T) - 505
Boundary Conditions at the Surface of Star Models. G. V. Ruben (T/E) - 649
Neutrino Radioactivity and Its Role in Astrophysical Processes. V. N. Baier and I. B. Khriplovich (T) - 599

Stars, Superdense
Comments on a Paper by A. Cameron. G. S. Saakyan (T) - 60
Plasma Phenomena and Supernova Outbursts. D. A. Frank-Kamenetskii (T) - 349

Stars, Unstable (Nonstationary)
Photometry of the Continuous Spectrum of P Cygni Type Stars. V. P. Arkhipova (T/E) - 51
Plasma Phenomena and Supernova Outbursts. D. A. Frank-Kamenetskii (T) - 349
Radiative Transfer in the Continuous Spectrum in the Absence of Thermal Equilibrium. D. A. Frank-Kamenetskii (T) - 182
Symposium on Nonstable Stars. A. A. Boyarchuk (R) - 153

Stars, Variable
Photometry of the Continuous Spectrum of P Cygni Type Stars. V. P. Arkhipova (T/E) - 51
Plasma Phenomena and Supernova Outbursts. D. A. Frank-Kamenetskii (T) - 349
Radiative Transfer in the Continuous Spectrum in the Absence of Thermal Equilibrium. D. A. Frank-Kamenetskii (T) - 182
Symposium on Nonstable Stars. A. A. Boyarchuk (R) - 153

Sun, Absolute Magnitude
Determination of the Stellar Magnitude of the Sun in Tricolor Systems Based on Absolute Spectrophotometric Measurements. Z. V. Karyagina and A. V. Kharitonov (E) - 857

Sun, Activity and Active Regions
Determination of Some Large-Scale Motion Parameters in the Solar Photosphere. N. I. Kozhevnikov and M. A. Klyakotko (T/E) - 44
Estimate of the Electron Densities in Stellar Chromospheres, M. A. Livshits (T/E) - 813
Period of Variation of Characteristic Dimensions of Circulation on the Sun. M. A. Klyakoto (T) -590
Radio Emission from Solar Active Regions in the Millimeter Region. A. G. Kislyakov and A. E. Salomonovich (E) - 177
The Corona and the 11-Year Cycle of Solar Activity M. N. Gnevyshev (T/E) - 311
The Structure of the Solar Atmosphere in Active and Undisturbed Regions. Ionization of Hydrogen and Helium. R. A. Gulyaev, K. I. Nikol'skaya, and G. M. Nikol'skii (T/E) - 332

Sun, Atmosphere
Determination of the Chemical Composition of the Solar Atmosphere. R. B. Teplitskaya and V. A. Vorob'eva (E/T) - 778
Displacement and Broadening of Fraunhofer Lines. I. The Rotational Velocity of the Sun at the Equator I. A. Aslanov (E/T) - 794
Estimate of the Electron Densities in Stellar Chromospheres, M. A. Livshits (T/E) - 813
The K_{232} Line Profile and the Structure of the Solar Atmosphere. V. N. Obridko (T/E) - 342
The Structure of the Solar Atmosphere in Active and Undisturbed Regions. Ionization of Hydrogen and Helium. R. A. Gulyaev, K. I. Nikol'skaya, and G. M. Nikol'skii (T/E) - 332

Sun, Corona
Polarization of Radio Waves Passing through a Transverse Magnetic Field Region in the Solar Corona. V. V. Zheleznyakov and E. Ya. Zlotnik (T/E) - 485
The Structure of the Solar Atmosphere in Active and Undisturbed Regions. Ionization of Hydrogen and Helium. R. A. Gulvaev, K. I. Nikol'skaya, and G. M. Nikol'skii (T/E) - 332
The Corona and the 11-Year Cycle of Solar Activity. M. N. Gnevyshev (T/E) - 311

Sun, Faculae
A Facula Model. M. A. Livshits (T/E) - 28
Dependence of the Contrast of Faculae on Wavelength. Determination of the Spectrophotometric Temperatures of Faculae. V. D. Kuz'minykh (T/E)- 323
Facula-Photosphere Contrast in the Region λ λ 6700-

21,000 A. V. G. Kuz'minykh and G. F. Sitnik (E) - 730
The Difference between the H_α and H_β Line Profiles of a Facula and the Photosphere. O. N. Mitropol'skaya (T/E) - 328

Sun, Flares
Relative Spectrophotometric Measurements of Certain Solar Chromospheric Lines Observed During the Total Solar Eclipse of February 15, 1961. A. L. Stolov (E) - 532
The Possibility of Application of the "Radiating" Electron Theory to Describe the Generation of γ Radiation in Chromospheric Flares. E. É. Guseinov (T/E) - 444

Sun, Magnetic Fields on
Measurement of the Magnitude and Direction of the Magnetic Field in the Region of Sunspots. B. A. Ioshpa and V. N. Obridko (E) - 776
The Formation of Sunspots and Solar Magnetic Fields. L. P. R. Romanchuk (T) - 365
Thermoelectric Phenomena on the Sun. II. Thermal Currents in the Central Parts of the Sun. G. M. Shtil'shtein (T) - 372

Sun, Parallax
The Constant of Aberration and the Solar Parallax. A. A. Mikhailov (E) - 737

Sun, Photosphere
A Facula Model. M. A. Livshits (T/E) - 28
Determination of Some Large-Scale Motion Parameters in the Solar Photosphere. N. I. Kozhevnikov and M. A. Klyakotko (T/E) - 44
Displacement and Broadening of Fraunhofer Lines. I. The Rotational Velocity of the Sun at the Equator. I. A. Aslanov (E/T) - 794
Facula-Photosphere Contrast in the Region λλ 6700-21,000 A. V. G. Kuz'minykh and G. F. Sitnik (E) - 730
The Difference between the H_α and H_β Line Profiles of a Facula and the Photosphere. O. N. Mitropol'skaya (T/E) - 328

Sun, Prominences
A Spectrophotometric Study of Four Bright Prominences. N. A. Yakovkin and M. Yu. Zel'dina (E) - 643
The Corona and the 11-Year Cycle of Solar Activity. M. N. Gnevyshev (T/E) - 311

Sun, Proper Motion
A Determination of the Solar Velocity Relative to Stars of Various Spectral Types and Luminosity Classes. E. D. Pavlovskaya (E) - 849

Sun, Radio Emission
Polarization of Radio Waves Passing through a Transverse Magnetic Field Region in the Solar Corona. V. V. Zheleznyakov and E. Ya. Zlotnik (T/E) - 485
Radio Emission from Solar Active Regions in the Millimeter Region. A. G. Kislyakov, and A. E. Salomonovich (E) - 177
The Frequency Spectrum of the Slowly Varying Component of Solar Radio Emission. V. V. Zheleznyakov (T/E) - 630
The Mechanism of Type II Bursts of Solar Radio Emission. S. B. Pikel'ner and M. A. Gintsburg (T) - 639
The Nature of P_I Type Peaks. V. E. Chertoprud (E/T) - 35

Sun, Spectrum
Absolute Measurements of Solar Energy in the Spectral Region 3382-10,000 A. M. S. Murasheva and G. F. Sitnik (E) - 623
The K_{232} Line Profile and the Structure of the Solar Atmosphere. V. N. Obridko (T/E) - 342
The Structure of the Solar Atmosphere in Active and Undisturbed Regions. Ionization of Hydrogen and Helium. R. A. Gulyaev, K. I. Nikol'skaya, and G. M. Nikol'skii (T/E) - 332

Sunspots, Magnetic Fields
Measurement of the Magnitude and Direction of the Magnetic Field in the Region of Sunspots. B. A. Ioshpa and V. N. Obridko - 776
The Formation of Sunspots and Solar Magnetic Fields. L. P. R. Romanchuk (T) - 365

Sunspots, Motion
Determination of Some Large-Scale Motion Parameters in the Solar Photosphere. N. I. Kozhevnikov and M. A. Klyakotko (T/E) - 44

Sunspots, and Radio Emission
Radio Emission from Solar Active Regions in the Millimeter Region. A. G. Kislyakov and A. E. Salomonovich (E) - 177

Supernovae, Classification
A Reclassification of Galactic Supernovae, with Tentative Identifications of the 1928 and 902 Outbursts. Yu. P. Pskovskii (E) - 501

Supernovae, Outbursts
Neutrino Radioactivity and Its Role in Astrophysical Processes. V. N. Baier and L. B. Khriplovich (T) - 599
Plasma Phenomena and Supernova Outbursts. D. A. Frank-Kamenetskii (T) - 349

Supernovae, Remnants
A Reclassification of Galactic Supernovae, with Tentative Identifications of the 1928 and 902 Outbursts. Yu. P. Pskovskii (E) - 501
Distribution of Polarized and Nonpolarized Radiation

in the Crab Nebula. N. S. Soboleva, V. A. Prozorov, and Yu. N. Pariiskii (E) -1

Precise Absolute Measurements of the Flux Density of the Crab and Orion Nebulae at 3.2 cm. V. S. Lazarevskii, K. S. Stankevich, and V. S. Troitskii (E) - 8

The Evolution of Supernova Remnants of the Type of Cassiopeia-A: Changes in the Spectral Index of Radio Emission. Yu. P. Pskovskii (T/E) - 17

The Mass of the Filamentary Nebulae (The Loop) in Cygnus. G. B. Sholomitskii (E) - 172

The Pulsation of Rotating Stars. V. V. Porfir'ev (T) - 441

Ultraviolet Emission

Structure and Far Ultraviolet Radiation of the Upper Stellar Atmosphere. I. Continuous Emission of Hydrogen and Helium. G. M. Nikol'skii (T) - 512

Ultraviolet Emission Lines in the Envelope of β Lyrae. V. Ya. Alduseva and L. N. Glushneva (E) - 519

Zodiacal Light

A Table for the Reduction of Photometric Observations of the Zodiacal Light for the Effect of Tropospheric Scattering. V. G. Fesenkov (T/E) - 670

Correction of Photometric Observations of the Zodiacal Light for Tropospheric Scattering. V. G. Fesenkov (T/E) - 23

Isophotes of Zodiacal Light from Observations Made in Egypt during the Autumn of 1957. V. G. Fesenkov (E/T) - 829

Lunar Effects on Zodiacal Brightness. N. B. Divari (E) - 547

Photoelectric Observations of Zodiacal Light from a High-Altitude Observatory. N. B. Divari and S. N. Krylova (E) - 391
